A very superior car – with new refinements

Built with traditional Humber quality, the latest Humber Hawk is one of the most advanced cars of today – in design, performance and luxury comfort. New refinements are now combined with its characteristic features:—smooth, quiet ride, powerful and reliable performance, running economy, front disc brakes, unitary construction and deep-comfort seating. Overdrive (on top and third gears) available as an extra.

NEW HUMBER HAWK

With its long, low lines and elegant styling, the Humber Hawk is groomed for the most important and diverse occasions. Its appearance is impressive; a close scrutiny reveals quality in every detail of its build and finish.

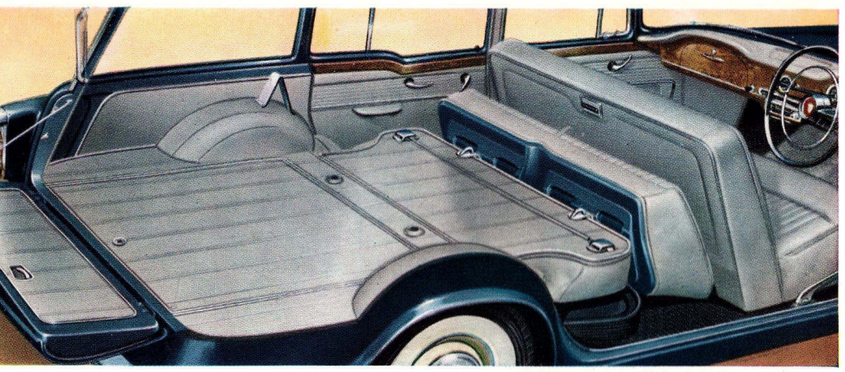

A ROOTES PRODUCT

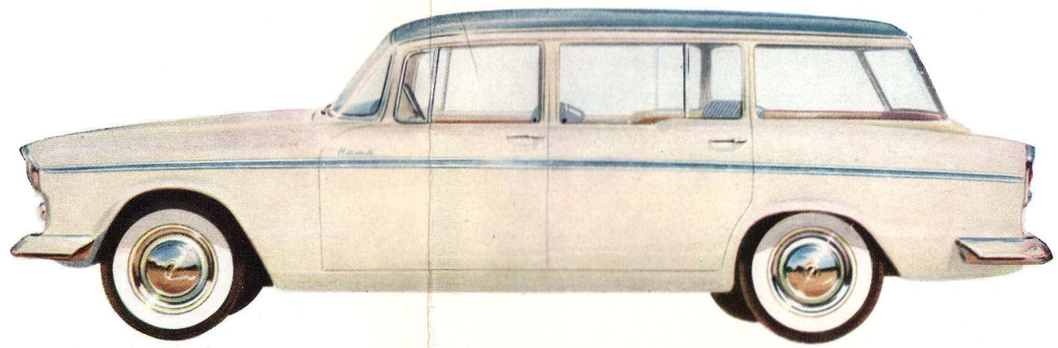

Whitewall tyres and rimfinishers are available as extras.

Quality and luxury comfort

Vision is superb. A wrapped-round front screen and wide-vision backlight provide broad, clear views for driving, parking and manoeuvring. With large side windows and slim pillars, you have panoramic travel views and maximum light in the interior.

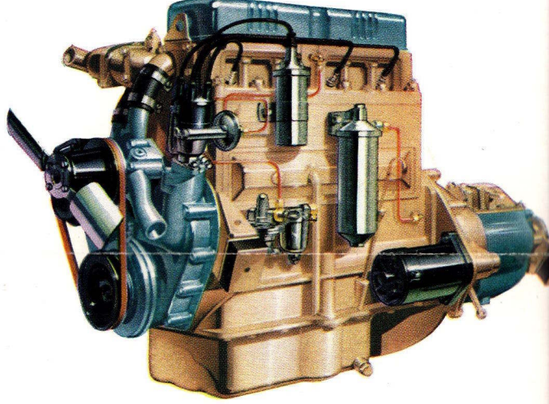

A highly-efficient suspension system gives firm road-holding and smooth, even ride – fully independent front suspension and telescopic shock absorbers are combined with wide leaf springs and an anti-roll bar. Disc brakes on front wheels ensure safe control at high speed.

A dignified dual-purpose car

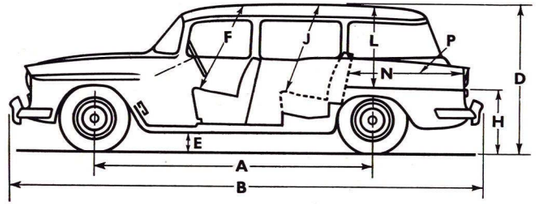

The Humber Hawk Station Wagon is fully comparable to the Saloon in elegance, performance and comfort. It can be used as a roomy six-seater, with luxury passenger comfort and generous accommodation for luggage. Or it can be quickly converted to a three-seater for transporting up to 840 lb. (381 kg.) of bulky goods. The backlight hinges up and the tailgate opens out to form a rigid loading platform – this can be left open for lengthy articles. When converted, the loading space is completely unobstructed, as shown on left.

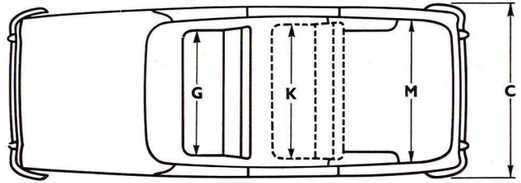

Power with economy

The Humber Hawk power unit gives excellent all-round performance, with a low fuel consumption for a car of this siz It develops 78 b.h.p. and has a compression ratio of 7·5 : 1. Features are:—a highly efficient cylinder head of compact desi for extra power and smooth operation; a thermostatically controlled manifold system to ensure quick starting from cold, a vibration damper on the crankshaft for smooth engine operation over the entire speed range; a balanced propeller sh in two sections and cushioned in thick rubber at the centre to absorb noise and vibration. The fuel tank has a capacity of 16 gallons (72 litres).

Dimensions and Colour Schemes of Station Wagon

		in.	m.
